Work Experience

Prezi

September 2019 - Present

Software Engineer

Working in a highly versatile backend team, owning the most critical backend services in the company. Some of my day to day tasks include:

- ◆ Building robust, scalable and resilient, large-scale distributed backend services
- ◆ Exploring, planning, scoping, developing, testing and maintaining software solutions
- ◆ Working closely with other developers, Product, Design and UX teams

Focus: Collaborative editing, Media Assets and conversions, Storage, Handling of presentations, 3rd party integrations (GSuite, Zoom, MS Teams)

Languages used: Primarily Scala, but also some Python, Java and Typescript

Technologies used: Docker, AWS, K8s, Jenkins, Akka, ZIO, Cats, Django

Skills

Technical Skills

- ◆ **Languages:** Scala, Haskell, Python, Java, Kotlin, C, C#, C++, Typescript, SQL
- ◆ **Competencies:** Data structures and algorithms, Purely Functional programming, Object oriented programming
- ◆ **Technologies:** AWS, Kubernetes, Docker, Akka, GCP, Firebase, Prometheus, Jenkins

Soft Skills

Detail Orientated, Curiosity, Critical thinking, Adaptability, Teamwork, Enthusiasm, Proactive

Education

Budapest University of Technology and Economics

Electrical Engineering: Infocommunications BSc

- ◆ **Thesis Work:** Developing a SaaS platform with the microservice architecture and cloud technologies
Languages: Scala, Typescript
Technologies: Akka, ZIO, AWS, Firebase, React
